Madiun, Indonesia.

Junior Web Developer with practical experience in backend development, REST API, and database design using PHP, Laravel, Javascript, React, and PostgreSQL. Contributed to the development of production-ready web applications while supporting deployment, testing, and system maintenance.

Education Level

- **SMKN 1 MEJAYAN** - **Madiun, Indonesia** Jul 2023 - May 2026
  Senior High School, Software Engineering (Rekayasa Perangkat Lunak)

Work Experiences

CV. Hexa Integra Mandiri - **Sidoarjo, Indonesia** Sep 2025 - Feb 2026

Software Developer Intern (Internship)

- Developed backend features for CariArena, a production web-based sports venue booking platform using PHP, Laravel, PostgreSQL, and RESTful APIs, supporting operations for 50+ sports venues.
- Designed and implemented a PostgreSQL database with 16 relational tables to support booking, transaction, venue, review, and user management workflows.
- Implemented authentication, email verification, and role-based access control (RBAC) to provide secure access across multiple user roles.
- Developed RESTful APIs and CRUD modules, enabling efficient frontend-backend integration and streamlined business operations.
- Led application deployment, performed database migrations, and conducted testing and production maintenance to ensure successful releases and system reliability.
- Worked with WordPress for website management and content updates during internship projects.

Projects

Parkindo – Parking Management System (2026)

- Developed a web-based parking management system using PHP, MySQL, Tailwind CSS, Alpine.js, and Chart.js, implementing MVC architecture and secure authentication.
- Built role-based access control (Admin, Staff, Owner), vehicle entry/exit management, automated parking fee calculation, and real-time dashboard analytics.
- Implemented reporting and data export features (PDF, Excel, CSV) to support operational monitoring and business reporting.

CariArena - Sports Venue Booking Platform (2026)

- Developed backend features for a sports venue booking platform serving 50+ sports venues using PHP, Laravel, PostgreSQL, and RESTful APIs.
- Designed and implemented a PostgreSQL database with 16 relational tables, supporting booking, transactions, venue management, reviews, and user management..
- Implemented authentication, email verification, role-based access control (RBAC), CRUD modules, and RESTful APIs, and independently handled application deployment, database migration, and production maintenance.

Skills

- **Programming Languages**: PHP, JavaScript, HTML5, CSS3.
- **Frameworks & Libraries**: Laravel, React, NextJS, Alpine.js, Chart.js, Tailwind CSS, Bootstrap.
- **Database**: MySQL, PostgreSQL, Database Design, Query Optimization.
- **Tools & Platforms**: Git, Github, Docker, Postman, Wordpress.
- **Soft Skills**: Analytical Problem Solving, Technical Communication, Cross-functional Collaboration, Systematic Thinking, Ownership & Accountability, Adaptability.

Certifications
